This cross-reference is provided as an aid in identifying which Westwood part numbers most closely replace those part numbers shown. It was accurate at the time it was created, to the extent that the information was publically available. Since manufacturers may sometimes change specs or discontinue products altogether, some inaccuracies may develop over time. Further, the Westwood parts shown will provide an equivalent, or superior, level of performance and service. However, due to differences among manufacturers, physical size and dimensions may vary.

FILTER LIFE INDICATOR GAUGE AND FITTINGS

The **FLI™** gauge is a color coded compound gauge that predicts filter life by showing the running vacuum as the filter loads up. The fittings may also be used as a diagnostic tool wherever a gauge needs to be inserted into the system.

Westwood

SECONDARY FILTRATION ASSEMBLIES

Fully assembled filter assemblies combining Westwood's premium cast iron top filters with Westwood's ultra fine spin-on filter. Connected in series, the **PRIMARY** filter catches most contamination; the **SECONDARY** filter traps the small nozzle plugging particles. All filters used in the secondary filtration assemblies are UL Listed. Service environment: Indoors, 20° to 105° F.

W/P No.	Primary Filter No.	Primary Element	Secondary Filter No.	Secondary Element
